I am a television viewer that cancelled cable/satellite in order to save money using an over the air antennae.

The costs associated with cable/satellite are very high and a majority of the shows we watch are the basic channels.

I was tired of paying for all these stations that we do not watch and I felt like I was forced to have a cable/satellite provider. These companies pay their executive teams millions of dollars and at the same time increasing the rates every 6 months to a year.

Instead of going after the LPTV providers, you should be going after the price gouging that is occurring with the cable/satellite providers. I should not be forced to pay for cable, satellite or fiber to watch TV.
