Federal Communications Commission
Attn: Public Comment on FCC 09-191
INTERNET NEUTRALITY
445 12th St., SW
Washington, DC 20554

Dear Commission:

We cannot stress the importance of internet neutrality and the impact on our daily lives. Doctors advice/appointments, insurance, banking/investments, bill payments, research/knowledge, mail/notifications, electronics maintenance/security: all issues handled over the internet. Many business aspects require internet interface: 'To contact us' through web addresses. Communication has been relegated to the internet. The public which owns the internet cannot be relegated to the lower tier of speeds. Major updates can cripple the use of a computer over the internet, 'you must update before you can access...'

You know this proposed orchestrated tiering of access to the internet is nothing more than privatization of public domain: pay more to get it done.

Sincerely,

A handwritten signature in cursive script that reads "Thomas Rodman & Margaret Rodman". The signature is written in black ink and is positioned above the typed name of the signatories.

Thomas & Margaret Rodman
