Please ensure that Internet access is left open and uncensored. I pay my provider for a certain amount of bandwidth already and the price keeps going up as the competition dissolves. There is getting to be lack of innovation and promotions. The new attitude by the big providers is "Take it or leave it" already. Most of us can no longer imagine life without the benefits of the web. Please do what you can to keep access open and equal to all users and providers. I was on the Internet when it was Arpanet and the advantages were clear from the start. Now it seems we want to regress. Keep it open and keep it fair.
