I just want to tell you how much RFD-TV means to this community. We are a very rural community and rely on this station (the only one I know of), to help supply our farmers and others with farm news. If this merger goes thru we must insist that the FCC require ATT/Directv to carry RFD-TV. We also love the country type programming that RFD-TV carries and know that this type of programming could disappear with this merger. Currently ATT doesn't carry RFD at all in their markets, so this is what concerns us the most. Please take our needs into consideration. Thank you for your help.
