I am a Directv user. When the merger is made with AT&T, please don't take RFD-TV off, which is channel 345 on my TV. I love this channel and my husband and I both get so much great news from and have learned about products that we didn't know before. We don't have a large farm, but we do have ten acres and we like to use it the best way that we can. Also, we really like, and look forward to, many of the shows that come on Saturday nights. My husband is a very hard worker and I am on Disability so we can't go to movies or out very often. We rely on our TV for most of our entertainment. RFD-TV is one of them. We look forward to watching all of the programs that come on Saturday nights, as I said earlier. Hee Haw, The Marty Stewart Show, Larry's Country Diner and The Nashville Reunion, just to name a few. Not to mention a lot of the other programs during the week. We enjoy other programs and movies on the other channels, but RFD-TV is up there at the top for us for quality TV. You're never afraid that you will hear bad language. The closest thing to nudity that you'll see are the cows and other livestock. So please take into consideration your public. The ones of us that pay you for the privilege to be able to watch quality TV. I am a writer, so I could go on and on about this. I just wanted to stress the point that these big conglomerate companies need to listen to the little people now and then. Without us, you wouldn't have a company to begin with. We are a mighty crowd. So please leave a good thing alone. Thank you for your time, Helen Efola Hadden and Gary Steve Hadden
