We would like to express our concern about RFDtv being taken off the air. Please do not remove RFDtv it is surprising how many folks watch this network. We need to keep our American heritage as much as possible and this channel is keeping this valuable and educational programming in the daily life of many folks. They cover the market news from a different angle than the national news channels. Commodity prices are important to everyone and how they move thru the markets is very important. We trust you will help make a good decision on behalf of RFDtv. Thank you.
