

7521733791.txt

Ladies and Gentlemen,
Please do not permit AT & T to remove RFD-TV from their channel line-up. This channel is used often in the urban school districts to show inner-city children where their food comes from. It lets them know that apples grown on trees and don't grow inside plastic bags in the grocery store.

It also helps us farmers with the latest information on best practices, what other farmers are finding useful, what other farmers are finding wasteful, etc. It is an invaluable tool in our arsenal to be successful with our business.

Please, do not let AT & T remove RFD-TV from their channel line-up.
Thank you,
J Houston
