

7521734555.txt

The FCC must preserve Net Neutrality by designating broadband as a telecommunications service under the law. Failure to reclassify Internet Service Providers as common carriers is an attack on our rights to connect and communicate. Net Neutrality is required for an Internet that enables and protects free speech. Please keep the Internet open for everyone. Please do not make a class-based Internet where information can be stifled. The Internet providers should not be allowed to charge different companies more or less for their data or to slow down, or block, access to Web sites and services they don't like or which with they compete.
