Please keep my Free Tv stations. Protect them and allow us to continue to enjoy them. Plus where will we be able to find out any information of impending storms or emergencies? I lived in the MidWest and without free TV several times I would have been put in danger when tornadoes were in the area. I now live in the northwest but the danger is still there but from different venues so please keep my local broadcasters free and allow them to remain on the air. Thank you

Ed Dwyer
