Strongly suggest in your upcoming merger (I'm a customer of both Direct TV and A.T.&T) that you will keep RFD channel coming our way! This channel has been such a blessing to both rural and urban subscribers now that the gap between "Town and Country" is narrowing.

Surging popularity of Farmer's Markets with urban consumers is only one indicator that we need the rural info coming as well as entertainment. My only reason for taking the satellite service is RFD. Without it, I have to go back to radio!
