I want to make public and complain that the California Los Angeles based radio station, KNX AM 1070 radio station, had been broadcasting things while they track me. KNX AM 1070 radio station do that as a revenge since I emailed them approximately two years ago and at that time when I emailed them, I complained in the email that I'm no happy that they broadcast things while at the same time that they track me. Then, after exchanged a couple of emails, KNX AM 1070 emailed me saying that they will not respond to my emails anymore. I had complained to FCC just too many times that KNX AM 1070 broadcast things while they track me. Well, if KNX AM 1070 emailed me and said I cannot email and complain this issue to them any more and FCC did not do anything about it either, then what you want me to do? That's why I'm making this public comment making it public that KNX AM 1070 radio station had been broadcast things while they track me and this is very frustrating. What I want to major complain about is KNX AM 1070 keep broadcasting things using tones to talk about me because they keep using tones to talk about me while they track me, track my location. Then, KNX AM 1070 do that more intensely almost like abusing me revenging me eversince after I emailed and complained to them approximately two years ago letting them be aware that they keep broadcast things using tones while at the same time that they track me. KNX do that as a revenge eversince my email to them approximately two years ago because they do that to me as a revenge and it's like they're almost abusing me. That's what I want to make aware and public about.
