In regard to this merger, I am concerned about the possibility that RFD-TV may be removed from the cable and satellite channels in favor of so-called "urban" programming. We have supported RFD-TV from its beginning and believe strongly that it should continue to be available, on both satellite and cable. RFD-TV provides a type of programming that is not available anywhere else. It is wholesome, educational and entertaining. It offers family viewing that can not be seen anywhere else, both to rural America and its many urban viewers. Americans need this choice. Do not allow RFD-TV to be replaced by any other channel.
