FCC Mail Room

**Remarks in response to the FCC Proposed rules, Docket  
Number FCC 14-61**

Dear FCC Staff;

I am writing in support of an open Internet. The Internet was developed at the public's expense broadband should be classified as "telecommunication", as it was originally. The current classification of broadband as "information service" allows for private networks, precludes regulation, and allows for a few predatory monopolies to control pricing and content.

Reclassifying all ISP as telecommunications service providers is the only way to preserve an Open Internet. The FCC should classify all broadband Internet Service as a common-carrier telecommunications service.

Thank you for your thoughtful consideration of these comments.

Sincerely,

  
Marilyn Montenegro
