AVERAGE DOWNLOAD CABLE SPEEDS IN THE US RANKING LOWER THAN ESTONIA. YES I
GUESS THAT THE F**KERS RUNNING THE FCC ARE REALLY DETERMINED TO TURN THE
US INTO A THIRD WORLD COUNTRY IN ORDER TO PUMP UP TIME WARNER, COMCAST ET
AL PROFITS. BULLSHIT!!!!!!!!!!!!!!!!!!!!

Subject: My 2 cents on FCC proposed rules on allowing Internet fast lanes

To Chairman Tom Wheeler and the FCC Commissioners-----

Dear Mr. FCC Chairman Wheeler

I will break this down in several sections to help you understand why this is a bad decision.

Let's begin with "Free Market". Now all the Telcoms who are saying having fast and slow lanes promote free market are full of BULL. No corporation wants free market, they want an advantage that will put more dollars in their pockets. You should know given your employment history. Let's follow this to it's conclusion. Fastlanes are in place, Internet sites are charged exorbitant prices to use them. Who gets the money for the fastlanes? The FEW corporations that own/lease the wires delivering content. A larger portion of the available line usage is dedicated to the fastlanes, and even though my Netflix uses a fastlane, my "last mile" internet will slow down due to the usage taken up by the fastlanes... Guess what! I'll still pay the same for my slower speed. You tell me what's "FREE" about that market. All I see is a few big corporations taking advantage of everyone else. And don't give me that "I won't feel the it" crap. The Internet speed isn't unlimited, The flow is only so fast, if you push more through one pipe the other pipe loses pressure. We're not stupid.

Second, "Fastlanes will help fund network upgrades..." Also Bull, America pays a higher price for slower Internet than most industrialized countries. How is that we have been dumping more money into our broadband access than most other countries and still have dead last speeds. Shenanigans! People don't get pre-charged for improved service. It's the other way around. I would go to a better/faster service if it were available. This is really what Free Market is.

Third, Startup innovation... Stifled! Enough said.

Fourth, Choice! Mainly Mine! Currently I have two choices, Slow At&t DSL, or Speedy, crappy service, Comcast. I use At&t because they are reliable and polite on the phone. I would like the faster service, but what does speed matter if the connection is always dropping.

Finally, equality! It's on everyone's lips. Corporations have too much control of the lives of the masses. This is one more nail in the democratic coffin. Born is the new Oligarchy! Prove me wrong! You would allow a few big corporations the power to dictate to all US citizens what kind of Internet connection they can have. By eliminating choice and innovation, and replace it with "our way or the highway" policies. Hows that for equality.

If you want companies to innovate, stop giving them free money! Make them work for it. That's what inspires innovation, competition and

improvement. You can't just hand companies a free ride and think they're going to improve. What's the incentive? They got a free ride, no need to actually work for the money. You need to declare Internet service a utility! Stop messing around with us. Stop pandering to corporate interest (and I hope you're not gotten bribes). Make the Internet what it's supposed to be, an open place for all to learn, educate, innovate, and grow.

Thanks for reading

Chris

To Chairman Tom Wheeler and the FCC Commissioners----

Dear Chairman Wheeler,

I am writing to urge you to protect net neutrality. A free and open internet is the keystone in building a 21st century America. This pathway to the future needs to be open to ALL, regardless of size or resources available. We have seen the horrible effects of this kind of monetized system in our recent political realm. There can be no disagreement as to the problems it creates. Please do not allow the internet to fall into the hands of corporate interests. As much as they "say" they will not allow for any changes, any public opinion poll will show you that telecom and cable companies are the most hated. No one would believe that the reasons for this hatred wouldn't also include lying, or backpedaling on promises. It's happened before.

Only a free internet can be an open internet. Please protect the internet from fast lanes, prioritizing, and slowing. Protect that which you have been placed in charge of. Don't be a dingo.

Subject: NO TO FAST LANES AND INTERNET DICTATORSHIP!!!
Enough is enough! SOPA and PIPA were attempts to end Internet freedom! This is just one more move to control our "freedom of speech". Internet has become one big phenomena that I doubt anyone ever thought of. It has become a place where our mentalities are molded and our thoughts written!
