

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality.

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Subject: Fast lanes, broadband & Title II Common Carriers

- 1) Should fast lanes be banned? YES
- 2) Should broadband providers be classified as Title II Common Carriers?  
YES
- 3) Should these same rules apply to wireless (mobile) providers? YES

By allowing ISPs to charge a premium for preferential treatment (which is exactly what this will become) the US government will effectively stifle one of the few industries we still dominate on a global scale, by crushing innovation and the entrepreneurial spirit of this nation.

The free market is unable to respond accordingly given the anticompetitive laws restricting carriers to cover certain geographic locations. With laws that led carriers to enjoy essentially monopolies in many areas around the nation, consumers have lost the ability to be protected from price gouging and corporate market manipulation. In addition, smaller companies will no longer be able to compete. There would be no Facebooks, Linked-Ins, Googles, or Netflixes.

Thank you for adding my concerns to those against the FCCs currently proposed plans.

Subject: Public Comment

We already told what to do about net neutrality once before when you (the FCC) had hearings on this a couple years back in 2010. An overwhelming Majority of Public Comments told you to reclassify it. You didnt listen and here we are 4 years later making the same exact case because the court overruled your error. You will never listen to ordinary people. Cause you don't care about them. And no matter how many comments flood your input in support of reclassification you surely wont do it. I'm guessing Mr Wheeler will surely look to serve his Former Corporation over his Country. Reclassify Now and quit kicking the can down the road for a Republican to get the blame for killing the internet.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners-----

Chairman Wheeler,

It is critical to free speech and the development of new businesses that Internet Service Providers not be allowed to regulate Internet data rates.

The modern use of the Internet was based on the idea that anyone could put up a web page or otherwise communicate with anyone else, anywhere in the world regardless of how much money they had. I know. My use of the Internet goes back to the command line days. The current equivalent of the early web page is streaming media -- precisely what the large ISPs want to throttle. The egalitarianism of free speech on the Internet would be stifled.

Similarly, with regard to nascent businesses, the Internet has traditionally offered a platform for even the smallest start up to reach customers. Demanding premium charges to permit unthrottled streaming media, VOIP, video conferencing and other bandwidth-intensive technologies to function is an egregious and unreasonable and unfair burden for smaller businesses.

I hope you will heed the will of everyone other than large ISPs and support Net Neutrality.

Sincerely,

Eric Nathanson

To Chairman Tom Wheeler and the FCC Commissioners-----

Dear Sirs,

I am a musician in training. I take lessons on my computer each week. Also, I use video resources to further my knowledge about music theory and practice. Without an open and free internet this would be expensive and prohibitive for me.

Along with this I read newspaper articles on line and watch video feeds. Currently much of this is free. Since I live on a limited budget any increase in cost will have a detrimental impact upon me.

In my opinion, a free and open internet is a necessity and we should not allow a few corporations to limit access by manipulating this resource via pay to play schemes.

Subject: Strongly in Favor of Net Neutrality, Strongly Opposed to the Prioritization of Certain Favored Internet Services  
I strongly favor net neutrality and am strongly opposed to any regulation or legislation that allows for the prioritization of one type of Internet service over another. The engine of Internet innovation is completely dependent on the equal treatment of all traffic. If you take that away the Internet will cease to create new industries, jobs, and new innovative services and become a stagnant, mediocre, commercial channel controlled by a few rich companies. Innovation will be driven off shore and foreign economies will enjoy its benefits.

Subject: GN Docket No. 14-28. Protect net neutrality, reclassify  
broadband access.

To Whomever it May Concern:

Protect net neutrality, and do it right this time.

Recognize the reality that broadband Internet service is a telecommunications service, not an "information service," as it is currently misclassified. It should be regulated under Title II as a common carrier, subject to all the nondiscrimination principles that govern such utilities.

Statements from your chairman make it clear that reclassifying Internet service in this way may be necessary to ensure net neutrality in the future. The currently-proposed, weaker rules will allow ISPs to discriminate against minority voices, smaller companies, and diverse sources of information. Ensure that this does not happen by issuing strong common-carrier regulations now, covering both wired and wireless broadband carriers.

Protect the rights of minorities, small businesses, and consumers.  
Protect net neutrality now.

To Chairman Tom Wheeler and the FCC Commissioners----

Net Neutrality : the last real outpost of a free society. We need Net Neutrality to retain that ideal of America, of a free country where everyone can express their opinion, have their say and seek out the information they need. We are not ruled by corporations, not yet, not completely, please leave this one last freedom available to the American people. Protect Net Neutrality- make laws to protect it. Protect an open internet; this is one of the most important civil right issues of our time. Do the right thing.

Dear Tom Wheeler:

These comments are in response to proceeding #14-28.

Free speech should not be bought and sold. The proposal to grant ISPs the right to charge for 'fast lanes' threatens this celebrated American principle. The company that connects us to the internet should not get to manipulate or control what we do on the internet.

I'm calling on you to reclassify the Internet as a telecommunications service to obligate ISPs to deliver all data on the Internet without discrimination. Please do the right thing: let corporations know that the Internet is not for sale to the highest bidder.

Thank you for preserving a free and open Internet.

Subject: Official Public Comment on Rules Regarding Net Neutrality  
My name is Andrea DeWees and I live in Seattle, WA.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

The Internet is important to me because it is an essential commerce portal and information medium. Without net neutrality, the freedom of information sharing will be restricted at the hands of big business and the 1%. The FCC's current rulings regarding net neutrality are not in line with the intentions of a capitalist society requiring fair competition in the marketplace. Because of this, I feel that I may be unduly burdened as a user of the internet in that my access to information and innovative resources will be limited, funneled or restricted.

Sincerely,

Andrea DeWees

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners-----

To those whose choices will so greatly impact the internet. I spent my post graduate studies searching libraries to understand classical and medieval cultures and history... years. A relatively open internet has allowed me to search information much more quickly from various sources and countries to try to ascertain what is actually happening in the world today. That ability has been invaluable to my understanding of the world and the major players on its stage ... thing Shakespeare's "... life's but a tale told by an idiot, full of sound and fury, signifying nothing..." Modern commercial media is like that.

In order to avoid the violence and revolution that monetary control of the internet information source now available, we must have an open, neutral internet access policy. If not, we will sooner or later have the violence that supression of open iformation will generate. Why would you want that?

Information control helped to formet world wars I & II, not to mention the battles of Troy and the conflicts betweent the Greeks and Persians, not to mention so many others. Why would you want us to go down those paths again?

To: The Commissioners of the FCC

Your proposed path would open the door to widespread discrimination online. It would give Internet service providers the green light to implement pay-for-priority schemes that would be a disaster for startups, nonprofits and everyday Internet users who cannot afford these unnecessary tolls.

I urge you to scrap these proposed rules and instead restore the principle of online nondiscrimination by reclassifying broadband as a telecommunications service.

Chairman Wheeler,

Please keep the internet as it is today. The internet is the last part of my life that is not one sided in favor for the BIG businesses. They are the ones who hold our internet lives in their hands, but their overwhelming greed, they want, with your help and blessing, to squeeze the last dollar out of the rest of the population.

Just what is the reason you are in favor to make the change? There a few of the very rich that want it, the rest of the country do not? So it seems you must side with the very rich? Is that it?

I was in the telephone industry when Judge Green handed down his verdict to level the playing field and allow competition to prevail. The price of telephone service dropped significantly, service greatly improved, and features and capabilities exploded. Now look what has happened, the telephone industry is coming back to where it was before the breakup of AT&T.

It is looking that, with your help, that the internet is going the same way, a few lording it over all the rest. What will be coming if this passes, is the AT&T monopoly will coming back in the form of the internet. Look forward and you will see the damage this will do. It

cannot improve the internet except in the pocket of a few. Is there any way to stop, or at least slow down the oligarchy?

of telephone service dropped significantly, service greatly improved, and features and capabilities exploded. Now look what has happened, the telephone industry is coming back to where it was before the breakup of AT&T.

It is looking that, with your help, that the internet is going the same way, a few lording it over all the rest. What will be coming if this passes, is the AT&T monopoly will coming back in the form of the internet. Look forward and you will see the damage this will do. It cannot improve the internet except in the pocket of a few. Is there any way to stop, or at least slow down the oligarchy?

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners----

Please keep net neutrality and an open internet. I have a Masters Degree in Computer Science from NYU Courant Institute and very clearly understand the technical aspects of this issue.

Thank you for your attention,

Dan Robinson

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality.

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Subject: Chairman Wheeler's "Fast Lane" and "Slow Lane"  
Chairman Wheeler's outrageous proposal for "Fast Lane" explicitly endorses "Slow Lane" for the rest of us.

"Slow Lane" unless We the People can afford "Fast Lane" for all of our Internet use.

"Slow Lane" for public schools? Outrageous!  
"Slow Lane" for US, State & Local Governments? Outrageous!  
"Slow Lane" for public libraries? Outrageous!  
"Slow Lane" for small businesses, such as Starbucks free WiFi? Outrageous!
