RFD-TV is one of only 4 or 5 stations that are worth paying for on all the cable networks.

The other +150 that I have to pay for to watch RFD-TV are a waste of broadcast space on the transmission cables.

Why not take those +150 all down and give RFD more room?

It is a real shame that city people have no idea what it takes to put food on their table or what the people that grow that food really do or enjoy.

Please find space for just a little Country on the cable.
