Washington DC 20554

RE: Revision of Part 15 of the Commission's Rules to Permit Unlicensed National Information Infrastructure (U-NH) in the 5 GHz Band, ET Docket No 13-49

Dear Ms. Dortch:

I am a consumer with Cherry Capitol Connection of Elk Rapids, Michigan. As a business owner we struggled to compete in a world that was moving at the speed of lightening and was internet and digitally driven. We had only dial-up or sat internet speeds and they would not allow us to compete in the business world.

When we were able as a rural business to communicate with our customers at a speed equal to the rest of the world, business increased by 30-40% within a year and we are still growing.

As a rural business consumer we ask that the Federal Government reconsider this ruling which would either make this service unaffordable or worse unattainable.

In a struggling economy I would ask that the Federal and State Governments not create more burdens for the small business owner – we are the engine of this country.

Thank you for your consideration,

Carolyn C. Sutherland
