

**FCC Mobility Fund**

**Project Description Status for CT 35057963700**

# 1 Project Summary

## 1.1 Background

The FCC Mobility Fund project is designed to improve coverage to underserved populations (roads) as part of a federal program to expand broadband coverage of unserved road miles with 3G/4G (3G = 200kbps/50kbps DL/UL) through rural America. T-Mobile was awarded funds to build approximately 122 sites across 17 census tracts in this two year program.

Funding Disbursements from FCC will be in THIRDS

- First 1/3 upon project awarded to T-Mobile (effective May 24, 2013)
- Second 1/3 upon demonstrating coverage of 50% of the awarded eligible roadmiles
- Last 1/3 upon demonstrating coverage of all eligible road miles awarded

## 1.2 Summary for CT 35057963700

Provide broadband coverage for 1,872.25 from a total of 1,936.15road miles. T-Mobile will build 12 sites with planned census tract coverage of 94.4% of the total road miles per the FCC MF grant.
