I live in Redondo Beach CA which is a suburb of Los Angeles and not a Rural area. RFD TV is important as I have a Bachelor of Science degree in Agricultural Management from Cal Poly SLO and keep up on news and trends in ag. My family has been in California for over 150 years and still operate the same ranch in Northern California that my Great Grandfather bought in the 1860's. RFD TV needs to stay on Direct TV as agriculture is still the number one industry in California.
