I am for continuing net neutrality on a continuous and institutional level. The free speech, open communication, shared education and available equality afforded by a net neutral internet should be available and affordable to all Americans. It is morally wrong to be for net-neutrality - it is not in the best interest of Americans. It would reduce, education, entrepreneurship and the free exchange of ideas.

Please do not give into lobbyist that are working to persuade you though \$\$ for net neutrality. Please choose the right choice for the American people.
