Certification of Compliance with Applicable Service Quality Standards and Consumer Protection Rules for Voice and Broadband Services

Service quality standards and consumer protection rules for broadband are not as defined as the rules for voice services. The Company complies with any service quality standards and consumer protection rules for broadband that are out there now and any that will be defined in the future.

Service Quality Standards

For voice services, the Company:

- Provides voice grade access to the public switched network.
- Provides flat rated local exchange service with no additional charge to end users.
- Provides access to the emergency services provided by local government or other public safety organizations, such as 911 and enhanced 911.
- Provides toll blocking and toll limitation services.

For voice and broadband services, the Company:

- Advertises the availability of its services and the charges using media of general distribution and/or on its website.
- Maintains a business office providing customers with access to a customer service representative either in person or via a local telephone call or toll-free telephone number during business hours.
- Directs after hour calls to the Company's help desk.
- Directs trouble reports to the on-call technician.
- Tracks all service orders to ensure they are completed in a timely manner.
- Measures its service connection and service interruption performance on a regular basis.
- Trains employees to:
 - Answer all incoming calls promptly.
 - Respond to all inquiries for information promptly and courteously.
 - Investigate thoroughly all customer complaints and handle appropriately according to the Company's guidelines for resolution of customer complaints.
 - Be knowledgeable about products and service offerings so they can assist the customer with selecting the best service option.
- Has a process for periodic inspection, testing and preventive maintenance of its equipment to permit the rendering of safe, adequate and continuous service at all times.
- Meets or exceeds the standards established by the state commission and provides any reports required in accordance with the state commission's rules.

Consumer Protection Rules

The Company has established operating procedures designed to facilitate compliance with applicable consumer protection rules which include compliance with the Customer Proprietary Network Information (CPNI) rules. The operating procedures include:

- Appointment of a compliance officer.
- A manual detailing the specific procedures for protecting consumer information.
- Employee training on an annual basis.
- A disciplinary process for improper use of consumer information.

If complaints are filed with the Company regarding consumer protection rules, the complaint is immediately investigated, the matter tracked and any corrective action noted. This process ensures that problems are addressed and corrections made.

HUNTEL CABLEVISION, INC.**

BACK-UP POWER

All switches are designed for 8 hour battery back up and all have a fixed standby generator that starts within minutes of a power failure with enough power to power everything in the office including air conditioning.

All DLC's and AFC's are designed with 4 hour battery backup. We also have portable generators that can be moved to the DLC if the power outage goes beyond 4 hours.

REROUTING OF TRAFFIC AROUND DAMAGED FACILITIES

All out state exchanges have common trunks to the Blair Tandem routed over a fiber ring. Blair and Arlington switches are located in the same building as the Blair Tandem. The facilities from Blair to Century Link and the IXC's in Omaha are fiber redundant. All switches also have an alternant route to the Century Link Tandem. Originating traffic would automatically reroute if the Blair Tandem failed but the terminating traffic would need to be rerouted by the carrier. The same local loop serves both the voice and broadband service to the subscriber.

TRAFFIC SPIKES

Capacity from the DLC's to the switch is designed at an industry standard 4 to 1 ratio. The switches are non-blocking. The trunk capacity to the IXC's is controlled by the IXC. They add or remove trunks depending on the volume of traffic. The trunk capacity to the Century Link tandem is also controlled by Century Link. Most trunk traffic is designed for high busy hour traffic capacity. It would be cost prohibitive to design for non blocking during and emergency situation. The broadband pipe to the world includes enough capacity to carry 20% more data than the peak usage times.

Nebraska Telephone Assistance Program Terms and Conditions

Nebraska Telephone Assistance Program

The Nebraska Telephone Assistance Program (NTAP) is available for qualifying customers of HunTel CableVision, Inc. d/b/a HunTel Communications. NTAP assistance reduces the cost of basic, monthly local telephone service. Eligible consumers can receive up to \$12.75 per month in discounts. In addition, the Federal Universal Service Charge is not assessed to consumers participating in NTAP. Toll Blocking prevents the placement of all long distance calls for which a subscriber would be charged. Toll blocking is available to eligible consumers at no cost. Also, by choosing this option, consumers are usually not charged a deposit.

NTAP is administered by the Nebraska Public Service Commission.
