NO. No. No. No to the 2-tier internet. No to monopolies. How is this not against the law? Is this a joke? I have Comcast internet and cable and it costs too much! You want to stimulate the economy? Here is how: Give everyone a base rate that ensures a profit for the internet and cable companies, yet is affordable. The End. No million dollar bonus', no to sales pitches by tech support. NO MORE GOUGING!
I rest my case.

I am a voter and intend to share my opinion.

Jon Baker
