RE: RM-11727

I am Michael Dudding, Owner and General Manager of KDSN FM 107.1. I strongly support the FM Class C4/ 73.215 petition filed by SSR Communications and urge the Federal Communications Commission to adopt this proposal.

Undoubtedly, the 3db increase in power and signal coverage would greatly enhance the ability of my station, KDSN FM, to serve a much greater population. The additional 6,000 watts will enable KDSN FM to reach more of the smaller communities in the valleys in western Iowa that have limited radio service because of unfavorable terrain.

Conventional radio is the last free remaining media source and should be available to as many people as possible. We have the ability to provide Internet streaming audio into many within specific communities - but fail to reach rural areas. Adoption of the C4 / 73.215 petition will help solve this dilemma.

I urge you to consider passage of the C4 /73.215 so KDSN can continue to serve more of the needs of people within our licensed broadcast coverage map.

Thank you for your consideration,

Michael Dudding  
KDSN FM 107.1  
Denison, Iowa
