

To whom it may concern,

Why is it that in recent years that people with money and power have been allowed to reverse the rules, laws, regulations that our forefathers have fought so hard to establish? Allowing internet providers to have control of who can have access to faster or slower internet speed is like letting a big corporation stomp out a little mom and pop starter company trying to make a living so they can afford to let their child have a better opportunity than they had in life. I am not the only one getting the short end of the stick from internet service providers, why is it that we trust what they advertise on TV, internet, pamphlets, newspaper, etc... and once we have their service and run into an issue the consumer always gets the run around, gets transferred back and forth like a tennis ball and the company is the people having fun playing that game while cheering them on to continue the game.

I want the internet to stay the way it is now, no one controlling it or influencing how it works. I want a law that forbids anyone/company/government from controlling how it works. If it happens it is like giving a single entity control, monopoly, of Pandora's box. Allowing them to make a profit for releasing certain diseases that have the potential to harm humanity.

Please take into heavy consideration of what the consumers are saying. Investigate what the companies are really after, the internet should be free equal access to everyone, and not go backwards and start segregating everything again.

Thank you for letting me speak freely and I hope to see that there will be no change to the internet, and change what big corporations are not allowed to do in the future.
