Dear Mr. Wheeler, You could keep the internet free and open, and be on the right side of history. When you die, you can't take all your bed-buddies money with you (Comcast etc), but you could leave a legacy of someone who actually overcame greed and made a good decision for the whole world. OR, if you don't do the right thing, you fucking piece of dog shit, I truly hope you choke on your money, you motherfucking greedy pig. Your memory will be alongside those such as Stalin and others who made the choice to be greedy fascist devils. It's all up to you :)
