It is obvious that a new breed of 'robber barons' are emerging on the American public. They are not listening to the American public. Case in point, with over 40 million viewers to RFD-TV, this station is being forced off the air in favor their own ideals. In order for me to obtain RFD-TV I have to buy a package that also includes about 20 sports and home shopping networks in my local area. Ridiculous! There are so many channels on DIRECT-TV, for example, that are nothing more than duplications of the same program. Ridiculous! There is room for RFD-TV. In my personal opinion, it appears that these communication moguls are being directed from higher up to broadcast certain programming with a total disregard to be American public.
