Comcast is already the worst consumer service entity in the world, hands down. Worse than Malaysia airlines, health and disease control of Sierra Leone, milk distributors in China, and disaster relief agency of Haiti. So please do NOT give more them more power so they can give even less shit about their cusomers. Our combined hatred for Comcast and its monopolistic ways is at a tipping point, where one more unjust legislation in their favor could stir such repugnantion that revolutionary chaos would ensue. So please, if you do not want to see Lynch mobs hanging Comcast execs by the cable modems then stop them from their own demise and strike down any attempt to alter net neutrality.

Sincerely,
millions of Comcast customer
