

7521757974.txt

Good evening, I would like to register my belief that Net Neutrality is essential to the future of the United States as we know it. This is not melodramatic, we have entered a time when narrow private interests threaten the lives of citizens in significant and unforeseen ways.

The internet was developed to ensure the persistence of information and evolved to foster the free exchange of ideas. This freedom has led to benefits beyond any imagination. Allowing private parties to interfere in this evolution will be detrimental to the future of this nation; our people will be hobbled in the development of the future and reduced to being consumers of the innovation developed by others.

The outcome of this evaluation will say a great deal about the values of our nation as expressed by our political process. As a veteran of four combat tours I would like to express that freedom is essential and Net Neutrality should be upheld.

Thank you for your time.
