It is essential to American small businesses that there continues to be net neutrality. There should be one speed of internet for all businesses, regardless of their buying power. This is how our largest web companies got to be where they are today. They had a novel idea and it became popular (Facebook, Twitter, YouTube). Allowing large companies to overstep fledgling business will cripple new companies from thriving. Please do not allow the stifling of small business. Small businesses and small business owners are the backbone of this country. Thank you.
