I am opposed to allowint the merger of the two largest cable providers in the country. The public good is not served by allowing a monopoly enterprise of any kind to function in the public airwaves. Comcast Cable cannot currently handle the business that it has, the service continues to get worse, their perception of customer is awful. Having been a customer at (7907Erie Baytown Texas) I can personally speak to the terrible customer service that Comcast provides. I also have been a customer of Time Warner, and thought that they were awful, then I experienced Comcast. Please BLOCK the merger of these two companies unless and until thae can PROVE through actions that they can serve the public interest with this merger.
