

7521759735.txt

We live in a rural area and depend on RFDTV to keep us updated with news and reports related to the latest farm and agriculture situations. Rural America relies on this information to keep us with the times so we can provide food for this country and the world. If this merger is approved rural America will be left in the dark! Most people in the large urban areas can not tell you where their food actually comes from. There are probably many lawmakers that are not sure of the whole food processing cycle. We need networks like RFDTV to not only keep rural America in touch with current news and data but to give urban America the opportunity to learn more about agriculture, the back bone of America. Please do not allow this merger!!
