I want to complain that this situation happened for more than twelve years since 2002. That means I've been suffering this situation for more than twelve years since when it first started was in 2002. This situation is whenever I turn on the radio station and/or television station and it doesn't matter whether it's wireless or cabled radio or television because it happened in all radio and television, which when I turn on that radio and/or television channel, then that radio and/or television channel is scanned by something or somebody, then that radio and/or television channel would keep broadcast things that monitor me and sense my breathing.

My major complaint is somehow my breathing get sensed. I've being tracked and again, somehow whenever I turn on the radio and/or television channel, then that channel is scanned by something or somebody, then that radio and/or television channel would keep broadcast things and talk about things that monitor me, monitor my location and sense my breathing.

My major complaint is somehow my breathing get sensed. I want to stop being tracked and I want my breathing to stop get sensed permanently.
