

WC Docket 14-93, Connect America Fund Phase II Challenge

Cebridge Acquisition, LP and Cequel III Communications I, LLC, d/b/a Sudden Link Communications LLC in Texas:

Per the National Broadband Map data, Sudden Link Communications, Inc. claims to offer voice service in 27 Census Blocks in Consolidated Communications of Texas (CCTX) Serving Areas that it would like to challenge. On the Suddenlink website, it advertises that customers can “keep your current phone number”. Given this option, CCTX should expect some level of porting activity in the identified CBs. CCTX has solicited GeoResults to try to obtain wireline, fixed wireless, and mobile wireless portability status for customer telephone numbers inside the CBs in question. An attachment describing the GeoResults effort is included in this filing. Based on the GeoResults data, the CBs in question that SuddenLink claims to offer voice service to have little (from 0% to 10% for residential and business locations found) porting activity and based on company porting data, there is no evidence that any of that activity is related to SuddenLink customers in the specified CBs.

Based on the evidence referred to above, Consolidated Communications of Texas Company challenges the competitive presence of SuddenLink Communications, Inc. in the CBs listed on the form 505.

Worth Every Penny

You shouldn't have to worry about pinching pennies or minding your minutes. Get unlimited local and long-distance calling for one low rate, plus all the phone features you've come to know and love, including call waiting and caller ID.
