Marlene H. Dortch, Secretary  
Federal Communications Commission  
445 Twelfth Street, S.W.  
Washington, D.C. 20554

Re: ET Docket No. 13-49

Dear Ms. Dortch,

Computer Sales & Services, Inc. hereby respectfully supports reconsideration of the Commission's decision to cease certifying Part 15 equipment under Section 15.247 and deciding to certify equipment *only* under the more stringent Section 15.407 out-of-band emission limits in the 5725-5850 MHz band.

Computer Sales & Services, Inc. uses a mix of technologies to provide broadband Internet access to businesses in the Houma, Louisiana area. We use fixed wireless broadband equipment certified under Part 15 Section 15.247 to provide this broadband service to businesses located in areas where traditional fixed broadband infrastructure such as that used to provide DSL and cable broadband is not available. Fixed wireless equipment is the only option we have in these areas. All of the wireless equipment we use has been certified under Section 15.247.

The Commission's decision to eliminate equipment certification under Section 15.247 will make our entire existing wireless infrastructure obsolete within two years. We will then be unable to expand or maintain our wireless infrastructure or continue providing Internet service to our many wireless customers. The only option we see is to rebuild our infrastructure using equipment certified under Section 15.407. Unfortunately, because of the more restrictive out-of-band emission requirements of Section 15.407 equipment, there is no comparable, economical Section 15.407 equipment available. New Section 15.407 equipment will be much higher in cost, have fewer available channels and have a significantly shorter communications distance. In short, denying us access to Section 15.247 equipment will force us to stop providing broadband to the majority of our Internet customers. I don't have to tell you the negative impacts that loss of broadband services will have on

businesses customers. No Internet, no web presence, no email and in many cases (most businesses use VoIP) - no telephone service. The effect will be catastrophic.

We support the Wireless ISP Association's Petition for Reconsideration and we ask that the Commission reconsider the decision to end Section 15.247 certification and to reinstate equipment certification under Section 15.247. Thank-you.

Respectfully Submitted,

Cliff LeBoeuf  
(President, Computer Sales & Services, Inc.)
