Stop this merger! Comcast is a huge company that's already too big. Their customer service is almost non-existent. We've called Comcast many times because our internet connection goes down frequently. Each time we call different employees give us different & conflicting information. After three years, dozens of phone calls, many trips to our local Comcast office to trade-in 'faulty' equipment, many hours spent waiting for the Comcast repair person to show up, our problem may have finally been fixed - we'll see. Monopolies and near monopolies mean worse and worse customer service. Customers need a place to go, a competitor to switch to, to keep the big companies honest and working for the customer. Please stop the Comcast merger with Time Warner!
