

Statement of Paul Lambert

My name is Paul Lambert, and I am the Engineering Manager of JAB Wireless, Inc. (“JAB”). This Statement and the attachments hereto provide factual support for JAB’s challenge to the designation by the Federal Communications Commission (“FCC”) of certain census blocks as “unserved,” when such census blocks are in fact “served” by JAB. This Statement accompanies the FCC Form 505 that JAB is filing in connection with the Connect America Fund Phase II challenge process.

I hereby declare under penalty of perjury that the statements of fact set forth herein are true and correct to the best of my knowledge, and that I have undertaken due diligence to obtain knowledge regarding these facts. My initials on the certification of FCC Form 505 attest to such certification.

1. JAB provides facilities-based terrestrial residential fixed wireless broadband and voice service to approximately 170,000 broadband subscribers and 20,000 interconnected VoIP subscribers in 14 states, under the following names:

<u>FRN Name</u>	<u>Trade Name</u>	<u>Service Areas</u>
AirCanopy Internet Services	Skybeam	TX
Digis, LLC	Digis	UT, ID, and NV
LP Broadband	Skybeam	CO, and WY
Essex Telcom, Inc	T6	IL, and WI
Rhino Communications	Rhino Communications	OK, and TX
Skybeam Acquisition Corp (Prairie Inet)	Prairieinet	IA, IL, KS, MN, NE, SD, and WI

2. JAB offers voice and broadband service in the census blocks documented in JAB’s FCC Form 505 (the “challenged census blocks”). Exhibit A hereto is a list of JAB broadband customer accounts, with partially redacted addresses, that are within the challenged census blocks.
3. In each challenged census block, JAB offers the public a service that provides (a) speeds of at least 4 Mbps downstream and 1 Mbps upstream, (b) at least 100GB monthly usage allowance, (c) round-trip latency of 100 milliseconds or less measured from the customer premises to the closest Internet core peering interconnection point and back to the customer premises, and (d) broadband and voice pricing at levels reasonably comparable to the pricing for similar broadband service in nearby urban areas. The price for such broadband service is less than \$60.00 per month, and the price for the voice service is less than \$46.96 per month.

4. In the challenged census blocks, our voice customers have ported phone numbers from the price cap carrier (i.e., CenturyLink, Frontier and AT&T) in their respective price cap areas.
5. Exhibit B hereto includes screen shots from JAB's various web pages describing the broadband and voice service offerings in the challenged census blocks including pricing information, and how consumers can subscribe to such services. Attached as Exhibit C hereto are copies of the Form 499 Filer Database information for the JAB entities.
6. In each challenged census block, JAB holds itself out to the public as able and willing to provide both broadband and voice service. As the information above indicates, JAB has voice- and broadband-capable physical assets that cover the challenged census blocks and has existing broadband, voice or broadband and voice subscribers as shown.
