While I currently reside in an urban community/bedroom community to the Washington, DC area. I also enjoy and plan to make my permanent home in West Texas on the western edge of the Hill Country. In my current, urban community the availability of RFDTV keeps me connected to that future home and informed of issues that affect it, including agro-business, energy, electronic communications and media, financial, socio-economic, and state/regional/national and geo-political news. My future Texas home site is in the rural U.S. where RFDTV is a vital information necessity to stay connected and informed of local community, regional, national and global social, scientific, political and economic issues and resolutions.

I am also offended and outraged that Al Jazeera or any such content has any place in or enjoys any promotion on American television or information network providers. I view the allowance or inclusion of Al Jazeera or other such middle-eastern or Southwest Asian or other terrorist-touting or promoting entity by any U.S. FCC policy or regulation as a seditious or treasonable act by a U.S. federal agency. Remember the Constitution. Remember the United States of America. Remember We The People...all the people, and expressly the rural American people on whose backs and by whose hands much of America's prosperity and reputation was gained and preserved! Keep and promote RFDTV programming in communication content and support positive communication technology for rural Americans!
