I am greatly concerned that the FCC seemingly has no concern for citizens of the USA who live in rural areas
does the FCC really think that because we live outside the city that we are of no importance if that is the case then maybe you should notify the IRS and suggest that they take all rural CITIZENS off the tax roll
it seems reasonable to me that if you would take a serious look at the situation you would see that the rural citizens go to the city and make purchases also when you advertise healthy diets where do they get their carrots and such
DON'T FORGET WE PAY FOR CABLE & DISH WE ARE PAYING CUSTOMERS LIKE ANY ONE ELSE
