For-ie, what in the heck is this bull of any cable company bragging that it is urban cable, to lie about trying to cut off many millions of profit paying subscribers who are not urban?

Isn't it the object and duty of cable television providers to carry popular programming such as the very popular RFD TV which is continually increasing its customer base desired and subscribed by over 40 million customers of RFD TV? Isn't cable programming for all walks of life willing to pay for it by millions of subscribers like RFD TV?

It must be the duty of the FCC to protect many millions of subscribers from mergers and cable providers such as Comcast, Time Warner, AT & T, Direct TV and any other cable entities by the FCC prohibiting them from cutting off cable subscribers on the whim of, oh well we are in urban areas when the fact is that due to worldwide Satellite communications television channels are all over the world to a huge number of subscribers who do not live in urban areas.

Here's what is going to happen, if RFD TV is ceased being carried by Comcast, Time Warner, AT & T Direct TV and any other cable entities: There will be a huge backlash of customers boycotting them and thereby costing them billions in losses.

If I cannot get RFD TV which is the absolute best in musical, and many other shows, I will cancel my cable subscription going to rabbit ear television.
Hey FCC, please do not allow the proposed merges to destroy consumer choices.

Thanks,

Paul D. Broussard
