I am a senior on a fixed income. I have no premium channels & moderate speed internet. My bill is \$161 a month now. How crazy is that? For those 2 services a bill of over \$150 a month. It won't be long until I simply will have to give up those things & it's my main source of entertainment. Why must it be so costly? Is it mega mergers such as Comcast & Time Warner? I doubt that there is a plausible excuse for how costly these services have become other than corporate greed & chasing the almighty buck at the expense (literally) of people all over the country. Are these companies deserving of getting everything they want at our expense? I don't think so & it's my hope that the FCC will protect us from unfair mergers such as this one.
