*RE: MB Docket No. 14-57*

Dear Chairman Wheeler:

I have been President and CEO of the Greater Reading Economic Partnership (GREP) in Pennsylvania since 2004, but before that, I spent 15 years working for Time Warner Cable, first as President in its Eastern Pennsylvania division, and then as President of its Binghamton division. I believe that I truly have a unique perspective on the proposed transaction between Comcast and Time Warner Cable.

My current role has afforded me the opportunity to work with Comcast as a community partner. Comcast has been an investor in GREP since its inception in 2002. GREP's mission is to attract, retain and grow business by vigorously promoting, fostering and coordinating economic development in Greater Reading. It is focused on retaining businesses, stimulating local entrepreneurship and attracting new businesses in the area. Our partnership with Comcast has grown from within our mission. This relationship with Comcast has allowed us to promote Comcast Business Services to all businesses considering locating in Berks County, PA. It is my understanding that through a transaction with Time Warner Cable, the small- and mid-sized businesses in the Greater Reading area will have enhanced access to innovative and new services that a combination of the two organizations could provide. This will make Reading more competitive - a notion I welcome.

Over the last several years, I have had the opportunity to sit down with Jill Horner on Comcast Newsmakers and discuss our "Ride to Prosperity" initiative. This initiative links eight organizations together to work towards a common goal of identifying specific work areas that will have a positive impact on economic growth and development. Infrastructure is one of the identified areas that can have a direct influence on Reading's prosperity. Comcast has already invested significantly in technology and infrastructure here in Reading and across Pennsylvania. I hope that allowing the transaction between Comcast and Time Warner Cable to happen will make an even more enhanced broadband network available to current businesses and assist in solidifying our ability to attract new businesses.

During my time at GREP, I have also had the pleasure of working with Elizabeth Sterner of Comcast. Liz serves on our Board of Directors and is Chairman of our Governance Committee. We have benefitted in many ways from her involvement with our organization, and she is an example of how Comcast hires quality people and encourages them to take active roles in the communities they serve.

As previously stated, my professional experience has given me a unique perspective as it pertains to this potential transaction. Having worked for Time Warner Cable in leadership positions and now alongside Comcast to provide economic growth and opportunity in Reading, I believe this union of two quality companies will benefit current and new markets in countless ways. I urge you to approve this transaction without delay.

Best regards,

Jon C. Scott  
President and CEO
