. Dear FCC, I beg you to DENY Comcast's bid to take over Time Warner. You have done almost nothing to prevent a few large communications conglomerates to become even larger, all at the expense of us, the individual consumer. I have seen my Comcast bill rise many times the CPI rate in my part of the nation. I have no other cable tv option as they are the only company serving my area. It is ludicrous that you would permit a huge company with almost a monopoly on cable television to become larger and thus continue to raise rates far outpacing the cost of almost anything today. Stop allowing Comcast and other large communication groups to build such huge monopoly-like companies that my choice is either pay their rate or not have cable tv. It's akin to allowing the growth of the BIG Bell company only to have to break it up. The smart thing is to not let it get so huge in the first place. Respectfully, DO YOUR JOB!! Please reject the Comcast/Time Warner Cable merger and give us American consumers a break. I would welcome any opportunity to speak openly and publically about this issue. Sincerely, Barry Cammer 2815 McGee Avenue Berkeley, CA 94703 510-849-0524
