. Dear FCC, I have Comcast cable service in Manchester, NH. I pay \$159.00/mo for using roughly 10 television stations and internet. My use of the internet is minimal. I don't use \"on demand\" or any attachments or features on my TV beyond watching TV. I don't even have a land line phone. I can't imagine Comcast improving service or making their rates more reasonable if allowed to merge with Time Warner. I don't think they should be rewarded for enjoying excessive profits by charging outrageous rates for such little service. Please do not allow the proposed merger to take place. Thank you, Bette Jo Scott 397 Kelley Street Manchester, NH 03102
