. This is not a good thing for the consumers. They are already a monopoly and \"group\" packages aka channels together whether you want them or not. Their customer service is terrible and I speak to people to whom English is their second language. Comcast bills you at the beginning of the month for the upcoming month, so if you make a change in service good luck figuring out your bill. They are a monopoly and need competition!! Cable should be a public utility. They have one in Chattanooga, TN that is much better than any private company. For example, Comcast FINALLY agreed to carry the SEC Network after Dish and others agreed. but we don't know what the cost will be. We always have to add channels during football & basketball season because some of the games are on \"premium\" channels. What was the Sherman Anti-trust for? Teddy Roosevelt would bust them up!
