RFD-TV provides vital information and entertainment of all kinds to many people throughout the nation. Please do not allow people who are non-rural oriented make decisions for those of us who enjoy rural life and rural programming. There are plenty of stations already available that are urban in nature. RFD is the only rural station. If we don't like the urban programming, we don't watch it but we don't say it should be dropped from the programming schedule so that no one can watch it. Please strongly consider all people of the nation not just a few.
