Comcast spent over \$7.5 million in 2012 to reach out to potential API vendors via advertisements in diverse media outlets including communication in Chinese, Filipino, Korean, Japanese, South Asian, and Vietnamese languages. These advertisements can reach subscribers on any of Comcast's diverse platforms, from the Xfinity Asia site to Crossings TV to Comcast's over 300 Asian On Demand options.

Comcast's commitment to Fremont and to the API community has earned the company my respect. I hope you will approve the transaction so that Comcast can continue to lead the industry in these respects.

Kind Regards,

Suzanne Lee Chan
