Are you kidding me? Is this a trick question? I thought you all (FCC) were on our (taxpayers) payroll; to give us a voice against runaway capitalism and corporate greed. How can less competition ever be in my best interest? Cable companies have historically never lowered their rates and in exchange have given us the poorest service of any sector. Now we are to believe that after over 35 years they are going to do right by consumers as opposed to share holders? Come on Ladies and gentlemen this is a NO BRAINER!!!
