Comcast is a Monopoly with abusive bait and switch pricing. As a Senior citizen I eliminated phone and cable TV service and saved about \$ 150 a month. Unfortunately I need internet service that continues to increase in price with little alternative options. The basic worked fine until they started to slow / interfere with Netflix's signal. They had me upgrade modem I later found out not necessary and service soon to be \$ 60 plus for internet only. Internet service should be provided to all at a nominal cost and it should be fast like other countries provide. Hope this helps block and merger, personally looking for a breakup.
