Dear Sirs: Please , for the sake of our democracy, do not allow this merger in favor of Comcast. As a former Comcast subscriber, I was never so happy to leave a company's who had such control over what I could or could not see over the airwaves. Controlling so much of the media in various forms constitutes a violation of freedom of speech. If one company can have control over what is produced and sent over the airways then our right our see all sides of an argument and make our own decisions is comprised. What ever happened to the Sherman Antitrust Act? It seems as if this has been swept aside in favor of companies making higher profits and having a monopoly to control pricing of the services. I already feel that the quality of what I have available to view on television is programming that is dumbing down of my intelligence. No one company should have so much control of communication media. Vote to not allow this merger for the sake of the American public.
