

PRESERVE NET NEUTRALITY

Large ISPs have effectively become localized monopolies, and they should be treated as such. That means putting them under the so-called "Title II" approach, which gives the FCC strong regulatory powers.

Listen to the VAST MAJORITY of citizens, and not just the interests of Corporations (which ARE NOT PEOPLE). If a Corporation was a person, it would have one vote. That's one vote for ComCast against net neutrality, and one vote from me in favor. Start counting the other votes (not the money).
